

# Anti Transgender Violence Report 2014

Overall 268 murders, 77 instances of direct physical violence, 6 suicides, 4 silicone murders and 3 missing persons were reported from November 19, 2013 to November 14, 2014. We have scant details on many of the victims.

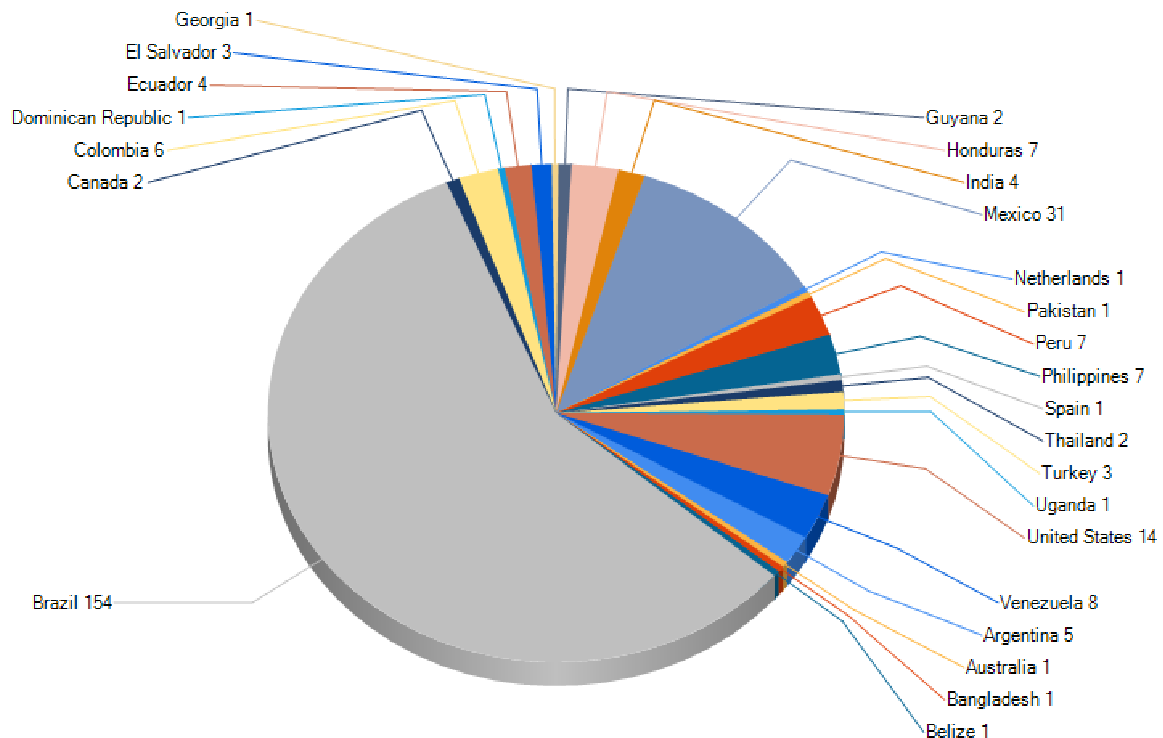

## Every 32 hours a transwoman is reported murdered.

The murders this year makes most other years pale in comparison.. Some of the horrific acts that people have committed against transgender people this year are as follows:

- A transgender woman in Australia was dismembered and cooked in a pot by her husband
- Five transgender women and numerous others in a club were firebombed in Mexico
- Two transgender women were skinned alive
- An eighteen year old was dragged behind a motorcycle through a city resulting in head trauma and death
- A sixteen year old was tied up, face burned repeatedly and then tortured to death
- A teen was set on fire on a public bus coming home from school in California

The unprotected transgender youth of the world continue to suffer as fifteen transgender teen women have been reported murdered all under the age of 19. Sadly, another four youths in the United States committed suicide and many more suicides have gone unreported.

## Murders By Country Breakout:
